PROFESSIONAL SUMMARY

Senior Software Engineer with **3+ years** of experience designing, developing, and deploying cross-platform mobile applications for iOS and Android. Successfully delivered **9+ production-grade React Native applications** across service marketplaces, e-commerce, on-demand delivery, ride-booking, real estate, and B2B sectors. Deep expertise in **TypeScript, Node.js, MongoDB, Firebase, Razorpay, and Stripe**. Proven track record of enhancing backend performance by **40%**, reducing crash rates, and managing complete product lifecycles from architecture through App Store and Play Store releases. Strong collaborator in Agile environments with cross-functional teams.

TECHNICAL SKILLS

Mobile Development: React Native, iOS, Android, React Navigation, Expo, AsyncStorage, FCM Push Notifications, App Store Deployment, Play Store Deployment

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Technologies: React.js, Redux, Context API, React Hooks, Tailwind CSS, Material UI, Framer Motion, Responsive Design, Flexbox

Backend and APIs: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control, Middleware, Axios

Databases: MongoDB, Mongoose ODM, Aggregation Pipelines, SQL, Query Optimization, Caching Strategies

Cloud and Services: Firebase Authentication, Firestore, Cloud Messaging, Crashlytics, Vercel, Render, Netlify

Payments and Maps: Razorpay, Stripe, Webhook Validation, Refund Processing, Google Maps API, Geolocation, GPS Tracking

DevOps and Tools: Git, GitHub, CI/CD Pipelines, Android Studio, Xcode, Postman, Visual Studio Code, Agile Scrum, Code Reviews

PROFESSIONAL EXPERIENCE

Senior Software Engineer

January 2023 – Present

Code Facts IT Solutions Pvt. Ltd.

Hyderabad, Telangana, India

- Designed, developed, and launched **9+ cross-platform mobile applications** using React Native for iOS and Android across service marketplaces, grocery commerce, on-demand delivery, ride-booking, real estate, rental, and spiritual commerce sectors
- Architected scalable UI component libraries utilizing TypeScript, React Hooks, Context API, and Redux to enable consistent, high-performance rendering across all mobile platforms
- Built and maintained **React.js web platforms and admin dashboards** featuring role-based access control, data visualization, analytics charts, and responsive component systems
- Designed and consumed **RESTful APIs** using Node.js and Express.js with JWT authentication, RBAC middleware, and comprehensive error-handling; enhanced backend performance by **40%** through MongoDB query refinement and caching strategies
- Incorporated **Razorpay and Stripe** payment gateways with complete refund handling, webhook validation, and secure multi-step transaction workflows across 6+ applications
- Deployed **Firebase Authentication, Firestore, FCM push notifications, and Crashlytics** for real-time features, live order tracking, and production crash monitoring

- Embedded **Google Maps API, GPS tracking, and geolocation services** for live driver tracking, geo-fencing, and distance-based pricing engines
- Managed complete **App Store and Play Store deployment lifecycle** including release builds, certificates, provisioning profiles, and store submissions; deployed web platforms via Vercel and Render with CI/CD pipelines
- Boosted mobile performance using memoization, lazy loading, FlatList refinement, and render batching to reduce UI jank and elevate frame rates across devices
- Collaborated with designers, backend engineers, and QA teams in **Agile sprint cycles**; conducted code reviews to enforce quality, security, and maintainability standards

KEY PROJECTS

Techmate – Service Marketplace Platform
Lead Mobile and Backend Developer

2024

Large-scale service marketplace connecting businesses, OEMs, service providers, and consumers. Developed complete ecosystem including Node.js/Express backend, MongoDB database, React.js admin dashboard, and React Native applications for iOS and Android. Architected REST APIs for bookings, services, and transactions; incorporated Razorpay payments with refund handling; deployed Firebase Auth and FCM. Streamlined backend queries achieving **35% faster API response time**.

Technologies: React Native, Node.js, MongoDB, Firebase, Razorpay, JWT, FCM, TypeScript

Gobooze – On-Demand Liquor Delivery Application
Mobile Application Developer

2023

On-demand delivery platform featuring 400+ premium beverages with age-restricted ordering, Stripe payments, and live order status updates. Developed both User and Partner delivery applications. Engineered for high-throughput peak hours with FCM-powered real-time notifications and refined rendering across multiple devices.

Technologies: React Native, Stripe, Firebase, FCM, Node.js

RntOut – Multi-Category Rental Marketplace
Full-Stack Developer

2024

Multi-category rental platform for furniture, vehicles, and real estate with geo-fencing, dynamic pricing, and real-time availability tracking. Designed distance-based pricing engine with Google Maps API and multi-step secure payment workflows. Enhanced booking accuracy by **40%**.

Technologies: React Native, Node.js, Google Maps API, Razorpay, MongoDB

GoChauffeur – Ride-Booking and Logistics Platform
Mobile Developer

2023

Ride-booking and logistics delivery platform with live driver tracking, trip lifecycle management, and Razorpay payment processing. Developed both Rider and Driver applications; created APIs for ride and partner management.

Technologies: React Native, .NET, SQL, Firebase, Razorpay, GPS Tracking

First House – Real Estate Discovery Platform
Mobile Developer

2023

Property listing and discovery platform connecting buyers, sellers, and builders with verified listings, search filters, real-time chat, and push notifications. Developed mobile application for iOS and Android plus admin and builder dashboard modules using Firebase and Node.js APIs.

Technologies: React Native, React.js, .NET, MongoDB, Firebase

Bodegaa – Hyperlocal Grocery Commerce Application
Mobile and Backend Developer

2024

Hyperlocal grocery platform managing thousands of SKUs with product catalog, cart management, checkout, address management, and real-time delivery partner tracking. Developed separate User and Partner applications; incorporated Razorpay checkout with refined MongoDB queries.

Technologies: React Native, Node.js, MongoDB, Firebase, Razorpay

SriRudra – Spiritual Commerce Platform
Mobile Developer

2023

Spiritual commerce application for curated pooja essentials, idols, and devotional products with calendar-based bookings, secure authentication, and Razorpay payments. Refined for high traffic during festival seasons.

Technologies: React Native, .NET, MongoDB, Firebase, Razorpay

Luxorace – Fashion E-Commerce Platform

2024

Mobile, Backend and Seller Module Developer

Fashion e-commerce platform for sarees and traditional wear with seller onboarding, inventory tracking, and payout management. Developed full seller onboarding workflow, inventory and payout calculation engine, and admin analytics dashboards.

Technologies: React Native, Node.js, MongoDB, Firebase, Razorpay

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering

2019 – 2023

Hindusthan Institute of Technology, Tamil Nadu, India

CGPA: 8.75 / 10

- Published research paper in IJERT on IoT-based Automation Systems
- Participated in National-Level Hackathons and competitive coding contests; introduced to JavaScript and mobile development
- Member of Electronics and Communication Club; led project teams for engineering projects

KEY ACHIEVEMENTS

- Successfully shipped **9+ production-grade applications** to Google Play Store and Apple App Store
- Enhanced backend performance by **40%** through MongoDB query refinement and caching strategies
- Achieved **35%** faster API response times for Techmate service marketplace platform
- Elevated booking accuracy by **40%** for RntOut rental marketplace through geo-fencing implementation
- Reduced application crash rates via Crashlytics monitoring and structured debugging processes
- Architected dual-app systems (User and Partner) across 3 different platforms
- Delivered projects across 8+ industry verticals within a 3-year tenure
