

MALLIKARJUNA RAO LATTUPALLI

Senior Software Engineer · React Native · Full-Stack Developer

+91-6304434947 · mrao.developer@gmail.com · LinkedIn · GitHub · Portfolio

Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

Senior Software Engineer with **3+ years** of end-to-end experience building and shipping **9+ production applications** on Google Play Store and Apple App Store. Specializes in **React Native** cross-platform mobile development and full-stack delivery across service marketplaces, e-commerce, on-demand delivery, real estate, and B2B platforms. Proven record of **reducing crash rates by 70%, cutting app load times by 35%, improving backend response times by 40%**, and maintaining a **zero-rejected-build record** across all store submissions. Proficient across the full product lifecycle — from UI architecture and REST API design to MongoDB schema modeling, secure payment integration, CI/CD pipelines, and production monitoring.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

January 2023 – Present

Code Facts IT Solutions Pvt. Ltd., Hyderabad, Telangana, India

- **Mobile Architecture:** Designed, built, and launched **9+ cross-platform mobile applications** using React Native for iOS and Android, leveraging Hooks, Context API, and Redux for performance-optimized state management.
- **Component Library:** Built a shared TypeScript component library of **30+ reusable UI components**, reducing feature development time by **approximately 40%** across all subsequent projects.
- **API Integration:** Integrated **15+ REST API endpoints** across 5 application verticals (authentication, bookings, checkout, order tracking, and notifications); standardized Axios interceptor patterns that reduced backend integration bugs by **60%**.
- **Backend Engineering:** Developed and maintained RESTful APIs with **Node.js and Express.js**, implementing JWT authentication, role-based access control, and robust error-handling middleware.
- **Database Optimization:** Modeled MongoDB schemas with Mongoose ODM for complex relationships and aggregation pipelines; improved backend response times by **40%** through query optimization and caching strategies.
- **Payment Integration:** Implemented PCI-compliant **Razorpay and Stripe** payment flows with refund handling and webhook validation across 2 live commerce apps — zero security incidents or payment-related bugs reported post-launch.
- **Performance Optimization:** Reduced app load time by **35%** and halved unnecessary re-renders through strategic `useMemo/useCallback` usage, FlatList windowing, and lazy-loading of heavy screens.
- **Web Platforms:** Developed and maintained admin dashboards using **React.js and TypeScript**, featuring charts, data tables, role-based access controls, and responsive component systems.
- **Maps and Geolocation:** Integrated **Google Maps APIs**, geolocation services, and a geo-fencing engine for distance-based pricing across mobile and web platforms.
- **Store Releases and CI/CD:** Managed the full app deployment lifecycle — release builds, code signing certificates, provisioning profiles, and Play Store and App Store submissions — achieving a **zero-rejected-build record across 9 apps**; deployed web platforms via Vercel and Render with automated CI/CD pipelines.
- **Agile Delivery:** Consistently delivered sprint features on schedule **90%+ of the time** while collaborating with backend, QA, and design teams in 2-week Agile sprint cycles.

TECHNICAL SKILLS

Mobile Development: React Native, iOS, Android, Xcode, Android Studio, AsyncStorage, FCM Push Notifications

Frontend (Web): React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Framer Motion

Backend and APIs: Node.js, Express.js, RESTful API Design, JWT Authentication, Role-Based Access Control

Databases: MongoDB, Mongoose ODM, Aggregation Pipelines, SQL, Query Optimization, Caching Strategies

Cloud and Real-Time Services: Firebase Auth, Firestore, FCM, Google Maps API, Geolocation, Crashlytics

Payments: Razorpay (payments, refunds, webhooks), Stripe (payments, refunds, lifecycle management)

Performance: Memoization (`useMemo`, `useCallback`), FlatList Windowing, Lazy Loading, Query Caching

DevOps and Tooling: Git, GitHub, CI/CD Pipelines, Play Store, App Store, Vercel, Render, Netlify, Postman

Engineering Practices: Agile/Scrum, Code Reviews, RESTful Design, Security Best Practices, Production Debugging, Cross-Functional Collaboration

KEY PROJECTS DELIVERED

Techmate — Service Marketplace Platform

2023 – 2024

Tech Stack: React Native, Node.js, Express.js, MongoDB, Firebase, Razorpay, JWT, FCM

- Built a full ecosystem comprising a Node.js/Express backend, MongoDB database, React.js admin dashboard, and React Native iOS and Android apps, enabling users to discover, book, and manage verified service providers and AMC packages.
- Delivered scalable REST APIs for bookings, services, and transactions; integrated **Razorpay** with secure refund handling and **Firebase Auth** and **FCM** for real-time updates.
- Optimized backend queries to achieve a **35% improvement in API response time**; shipped the initial version within a **6-week delivery window**.

Gobooze — On-Demand Liquor Delivery App

2023

Tech Stack: React Native, Node.js, Firebase, Stripe, FCM

- Built an age-gated on-demand delivery platform featuring 400+ beverages, real-time order tracking, and a partner delivery management application.
- Implemented the end-to-end **Stripe** payment and refund lifecycle; developed **dual applications** (User and Partner) with FCM-powered real-time notifications.
- Designed a scalable API integration architecture that became the **reusable blueprint for two subsequent delivery apps** at the company.

Bodegaa — Hyperlocal Grocery Commerce App

2023

Tech Stack: React Native, Node.js, MongoDB, Firebase, Razorpay

- Delivered a hyperlocal grocery platform handling thousands of SKUs with API-optimized data fetching that reduced screen load times to **under 1.2 seconds on mid-range devices**.
- Built cart and order lifecycle management APIs, integrated Razorpay checkout, and implemented real-time delivery partner tracking across separate User and Partner applications.

RntOut — Multi-Category Rental Marketplace

2024

Tech Stack: React Native, Node.js, MongoDB, Firebase, Google Maps API, Razorpay

- Developed a rental marketplace for furniture, vehicles, and real estate with a **geo-fencing engine** for distance-based dynamic pricing and live asset availability tracking.
- Designed multi-step secure payment workflows and improved **booking accuracy by 40%** through real-time availability synchronization.

First House / BestFinder — Real Estate Discovery Platform

2024

Tech Stack: React Native, React (TypeScript), .NET, MongoDB, Firebase

- Built a property listing and discovery platform with advanced search filters, real-time in-app chat, inquiry workflows, and Firebase-powered push notifications.
- Delivered a full-featured MVP — from kickoff to Play Store and App Store release — **within 8 weeks**.

Luxorace — Fashion E-Commerce Platform

2024

Tech Stack: React Native, Node.js, MongoDB, Firebase, Razorpay

- Developed a fashion e-commerce platform for traditional wear with a complete **seller onboarding workflow**, inventory and payout calculation engine, and admin analytics dashboards.

Garuda Gases — Industrial B2B Ordering Platform

2025

Tech Stack: React Native, Node.js, Firebase, Razorpay

- Built an industrial and medical gases ordering platform with order scheduling, live delivery tracking, and performance optimization for **low-network rural and industrial environments**.

EDUCATION

Bachelor of Engineering — Electronics and Communication Engineering

Hindusthan Institute of Technology, Coimbatore, Tamil Nadu, India

May 2019 – April 2023

CGPA: 8.75 / 10
